A **VERSATILE PROPOSAL** FOR PROJECTS OF VARYING SCALES, FEATURING EASILY OUTLINED FUNCTIONALITIES.

IT'S EASY TO INSTALL, MARKED BY **NOTABLE ADAPTABILITY,** AND DESIGNED TO SERVE THE USER WITH A TANGIBLE BUILDING AND HOME EVOLUTION.

ABOUT
ABOUT
ABOUT

A DISTINCTIVE STYLE

OL-U stands out thanks to its **ability to adapt** to different scenarios with great ease.

It has its own **style,** but it doesn't impose it. It seamlessly integrates into the environment and enhances its features, managing to **customize** its appearance consistently with what surrounds it.

Reliability translates into simplifying every daily action, allowing for quick and intuitive control of functionalities

TECHNOLOGY AND AESTHETICS

OL-U is the outcome of both **mechanical** and **electronic design,** enabling the expression of an aesthetic with adaptable functionalities over time.

Its **minimal footprint** and **swift installation** embody a design approach that effectively leverages cutting-edge technological solution.

Regular Version, White

FLEXIBLE

Multiple configurations allow one to choose from the simplest to the most advanced solution.

COMPATIBLE

They can be installed on multiple standards (2/3 modules boxes, double horizontal/vertical) and in combination with sockets from different brands and with different standards (45, 55, 60 mm).

INTUITIVE

A highly interactive RGB LED bar placed in the centre is programmable with different gestures: from tapping to dimmering to the innovative swipe option.

SIMPLE

Installation and configuration are extremely easy.

ESSENTIAL

The use of space is minimised thanks to the slim design, making a perfect fit on both inside and out of the wall.

VERSATILE

A range of thermostats, switches and multi-sensors enhanced by their finishes and design.

MORE THAN

Enhance **environmental control** through **simple, intuitive gestures** and **customizable functions.**

A touch becomes a tap or a double tap, programmable according to individual needs. The central bar serves as a guide for effortless adjustment.

A GESTURE
A GESTURE
A GESTURE

OL-U represents a new interaction with mechanical buttons to regulate progressive functions like **dimmable lighting, temperature, volume, etc.**

These features are controlled through a **unique touch interface,** delivering a clear and straightforward sense of the desired scale.

TRANSVERSALITY

OL-U is a state-of-the-art product naturally designed for **KNX, the secure and connected international standard.**

Engineered for cross-functional solutions, it can meet a wide range of demands, from private residential to contract applications. All this is made possible through various models, configurations, finishes, materials, installation standards, and sockets.

STYLE

The *Italian design* is always well noted.

Ideation, R&D and production are key elements for distintive solutions, demonstrating a native distintive style.

FLEXIBILITY

OL-U can be easily adapted to a variety of projects thanks to the customization features as icons and features.

This enables a solution that can be tailored in wide range of environment and even adaptable over the time.

EASY AND SIMPLE

OL-U has been designed having in mind the idea to contribute to simplify a day in life in a building or house. Human centric vision with technology servicing people as occupants, as programmers, as installers each one with the most closest UX.

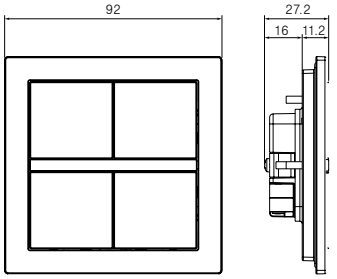
DATA
DATA
DATA



1. 4, 6, and 8 mechanical push-button switches
2. Thermostat, Humidistat and CO_2 sensor integrated
3. RGB Signalling LEDs
4. Touch capacitive central RGB bar with gestures and RGB signalling
5. Interchangeable aesthetic frames
6. Customizable buttons with icons and text
7. 32 logical blocks to create simple expressions with logical or threshold operators, as well as complex expressions with conditional algebraic operators, and predefined algorithms
8. The OL-U® KNX® range is available in various colors and can be installed on 2 or 3-module boxes, compatible with international major standards (Italian, German, English, Swiss)
9. The range can be configured via the ETS® application program and can communicate with the **KNX Data Secure** standard
10. All the devices integrate one 2-stage thermostats (two in the thermostat device) for the control of two distinct areas, both with integrated PI controller for piloting heating, cooling, valves, 6-way valves,fan coils 2 and 4 pipes.

CONFIGURATOR PORTAL & CUSTOMIZATION SERVICES

The KNX OL-U line offers a wide range of customization possibilities, allowing users to tailor the devices to their specific needs.

Our **in-house customization** service ensures maximum precision and quality throughout the process. Additionally, through our intuitive **customization portal,** users can independently choose the customization of device buttons through laser engravings for text and icons.

An innovative approach that allows for total flexibility in creating tailor-made user interfaces, both in terms of aesthetic design and functionality. This includes increased adaptability to different contexts, ease of function identification, and a distinctive touch that reflects the uniqueness of each project.

Visit **eelectron.com** to explore our portfolio as products, application and solutions.

For more than 25 years, we have been developing electronic devices and applications using the KNX protocol, now Secure, for building & home automation. Over time, we've incorporated DALI, BLE, and MQTT as facilitators for digital applications.

Our focus lies in crafting building & home automation solutions and intelligent systems geared towards energy savings, with a strong emphasis on design, technology, and enhancing comfort and control over electrical resources.

Research, development, design, and production are entirely carried out in Italy. Our commitment to a high standard of quality is detectable in our extensive range of products spanning residential, hotel, and building sectors. We have a presence in the Middle East, China, Southeast Asia, and Europe, and distribute our products to more than 80 countries globally.

To date, Eelectron devices have been installed in over 36.000 hotel rooms as well in prestigious villas, and large residential and commercial sites worldwide.
